WEB NEWS

cPanel Announces Control Panel Price Increase

cPanel is the control panel we use to administer each of our clients' v used for such things as statistics, email admin, ftp and passw directories. This is where we set up SSL Certificates and tens of c easily. We purchase a license for cPanel at our cost.

I have just been notified that there is a general price increase being effective immediately. Many other hosts are being hit with substantial much as a 287% bump in costs.

HOW THIS AFFECTS YOU:

We are insulated from much of this, and plan to hold the line on prices, time being. No price increase at this time, we will do our very best increase in costs.

If you want to learn more, you can either contact me OR read a thread [HERE](#).

HOW TO

What are some things I can do to improve my Google Ranking?

While keyword selection is probably the 900# gorilla in the Google and other ways to ensure Google is receptive to your website and ranks it w

- Include your keywords in your title tag
- Include keywords in your description tag
- Ensure you have a security certificate installed and in use. Test you going to https://yourdomain.com -- note the S in https. All of our hosts include a free SSL Certificate
- Fix all broken links ---they hurt your ranking

- Increase your website load speed. Optimize all css files, graphics
 - Ensure you have a small screen version of your site that loads quickly
- is fanatical about these items, and if your site is lacking in any are hurting your rank.

If you would like a free analysis of your site, go to our web site (<https://ameriwebhosting.com>) and click on the FREE SEO AUDIT button bottom right. It will arrive by email as a PDF file.

MARKETING

Use Coupons to Generate More Sales and Customers

Here are some raw facts we've found online that may help you to offer coupons to your business. **QUESTION: What are the habits of online coupon users?**

- Nearly 80 percent of consumers use coupons regularly
- 80 percent of those consumers describe themselves as “promotional”
- If offered a coupon, 91 percent of coupon redeemers say they will return to the retailer again
- Nearly 60 percent of consumers made a purchase because a coupon was offered
- 62 percent of consumers average of 2 hours per week searching for coupons and deals

When it comes to **social media and coupons**, Phil Frost of Main Street Marketing says “brands should use social media channels as well as other marketing techniques to advertise coupon campaigns.”

67% of consumers will “like” a brand’s Facebook page to receive a savings of 10 percent or more

71% have searched online for a coupon after being made aware of it or

54% have used a coupon found on social media

28% will share deals on social media

17% will Tweet or Retweet a deal from a brand on Twitter to save 25 per

Finally, email coupon campaigns:

93 percent of consumers said they are quite likely to use coupons recei

40 percent share the deals they receive via email with their friends

70 percent said they utilized a discount or coupon from an email within t

Companies see an 82 percent open rate from their consumers

If your business relies on **REPEAT** business, consider giving a \$1 coup
their next visit. Consumers are likely to keep it, along with your business
number, hours, etc.

If you are seeking **NEW** business, consider giving a "buddy" coupon, wh
customer can give it to a friend or family member. Let your customers d
your selling for you!

If you need some help with coupons, give me a call. No coupon necessa

ASK A TECH

Q: Which is better, a .com or .org domain extension?

A: ".ORG is trustworthy for non-profit sites, or sites related to social-
trustworthy for commercial sites. In eyes of Google, both are same."

**Q: I have a bunch of sites hosted on a server, and they keep gett
don't host with AmeriWeb, but would like to know if you can help**

A: Absolutely! Our servers are hardened so it is very hard for someone especially to hack into multiple sites at once. It is very rare for this to happen to our customers.

WHAT YOU CAN DO:

1. Change all of your passwords
2. If you use any scripts (such as Wordpress), make sure you are running the latest version on both wordpress AND all plugins.
3. Ask your current host to perform a security check for you.
4. If all of this fails, we are glad to work with you and move your sites to one of our secure servers. Call!
