WEB NEWS

NEW SERVICE **Offsite Email Archive Service**

We have just added a great new feature if you use your email account to retain important documents. Our email archiving gives you all these benefits... Just \$68.99/year

- Saves all email to a remote server for easy access
- Includes Incoming Email SPAM Filtering!
- Never lose an email again!
- Achieve legal compliance
- Improve IT system performance
- User friendly data-protection management
- Added email continuity, journal support, and easy re-delivery
- Compressed, encrypted and secure archive

Email Archiving

Email Archiving preserves and protects all inbound and outbound email messages for later access. It is a great way to recover lost or accidentally deleted emails, accelerate audit response, secure intellectual property emails and attachments, as well as for "eDiscovery" purposes in case of litigation.

Why you need it

Are you desperately looking for an important email from last year, but can't seem to find it, and you're risking a fine or losing an important business deal as the result of this? Prevent this with a professional Email Archiving solution. Email Archiving is a critical tool to preserve a secure backup of all email, and be legally compliant.

At the same time, as email exchanges have judicial power, and are legally binding, email compliance has become an extremely important concern for organizations. Therefore it is mandatory in certain industries to preserve a secure backup of all email messages and be legally compliant.

PLUS we include SPAM FILTERING free of additional cost. Win-Win!

HOW TO

Can I Deduct my Hosting Costs on my Income Taxes?

Check with your tax advisor, but in general hosting, design, marketing, domain names could all be used as deductions to reduce your tax bill. NOTE: The IRS has rules for business deductions you must follow.

You can download all of your invoices here:

MARKETING

When Planning Your 2021 Marketing Program, Remember These 2 Ideas

All good marketing programs have these two goals:

1. Reach the greatest number of likely buyers (prospects) as possible at low cost
2. Make it easy for them to contact you, order from you, or obtain more information.

It sounds so easy, yet in reality proves to be rather tricky.

Don't be afraid to experiment a little. Trust what is working for you, and tinker with what isn't. But always keep these two rules in mind. They do work!

ASK A TECH

Q: I am unable to access email from my home, and my web site does not appear. But both work when I try away from my home. Help!

A: Call us to check on this. It sounds like you had a password issue, and the server locked you out. This happens automatically after 10 consecutive missed passwords.

Fixing is a simple process, but I will have a question or three for you. Call or open a support ticket.
